

One brand, told the same way everywhere it shows up.

This guide is what keeps ReDefiners looking like ReDefiners, whether it's a flyer at a community table or a fifteen-second Reel. Follow it and every piece of content pulls in the same direction, because people trust a brand they can recognize.

LANGUAGES WE TEACH

4

Arabic · Mandarin Chinese · Spanish · English

What's new in FY26-27: we simplified and refreshed our brand colors, gave our two accent colors clearer jobs, and rounded both out into full neutral and accent color ramps, so there's a right shade for every situation instead of guessing. We also added a real diagram for the Clear Space Rule and fixed the broken links to our brand assets. This guide refreshes every fiscal year, so check the version tag in the footer for how current it is.

Accessibility Standard
WCAG 2.2 AA

1 Our Purpose

Every piece we publish should sound like it comes from the same organization, because it does. Start here before touching color or type. If the message isn't right, the polish won't save it.

Mission

To equip and empower individuals in the U.S. to be multilingual global citizens through accessible language education.

Vision

Communities in the U.S. embracing multilingualism and celebrating multiculturalism together.

Core Values

Leadership

We inclusively empower all stakeholders to lead with courage.

Culture of Learning

We study best practices, encourage innovation, and reflect to improve.

Community & Recognition

We honor the collective value of every individual in building global citizenship.

2 Color Palette

Every color we use comes from two families: Navy and Amber. Navy carries our steady, trustworthy side — text, logos, headers, the cool backgrounds around them. Amber carries our energy — the warmth of a milestone hit, a classroom win, a student showing up. Each family runs light to dark below, so any two pieces from the same family will always look like they belong together.

Navy Family — Cool

Navy #00303F

Our text, our logo, our headers. Use it as often as the piece needs.

Sky Blue #LEGACY #7A9D96

Retired. Reserve for anniversary materials only — see Section 4.

Ocean Mist #0FF0EE

Subtle backgrounds, data viz, soft accents.

Cloud White #F9FBFF

Gradient stops, soft section transitions.

Ice White #FAPCFF

Our default page and body background.

White #FFFFFF

Text on Navy, negative space, digital UI backgrounds.

Amber Family — Warm

Ember #FF4D00

Pressed states, urgent alerts, dark gradient stops.

Orange #FF7400

Our primary action color: CTAs, buttons, launches. Navy text or icons only.

Marigold #FF9A00

Hover states, secondary CTAs.

Warm Gold #LEGACY #DBB64D

Retired. Reserve for anniversary materials only — see Section 4.

Amber #FFC100

Our most-used color — badges, highlights, stat call-outs. Not on clickable elements.

Soft Cream #FAF5E6

Same job as Ocean Mist, warmer — summer, youth, and children's programming.

What capped means: Marigold, Orange, and Ember are action colors — they belong to specific moments (a button, a hover, an urgent alert), so together they should never cover more than half of what someone's looking at. Navy and Amber don't have that limit. They're our identity, not a state, so use them as often as the piece calls for.

Pairing rule: Always put Navy text or icons on top of Marigold, Orange, Ember, or Amber. Never white text on these four, and never use them as text color on a white background. Amber and Orange pass WCAG 2.2 AA against Navy (8.6:1 and 5.2:1) but fail against White (1.6:1 and 2.7:1); Ember only clears the large-text/UI threshold.

3 Typography System

Montserrat carries the brand. PT Serif shows up only when we want something to feel considered, like a testimonial or a mission line. Never mix in a third typeface.

Primary Typeface: Montserrat

Montserrat Black	
ExtraBold	
Bold	
SemiBold	
Regular (Body Text)	
Light (Decorative Only)	
WEIGHT	USAGE
Black (900)	Hero headlines, campaign titles, social post headers (32pt+ digital / 18pt+ print)
ExtraBold (800)	Section headers, email subject lines, video titles
SemiBold (600)	Subheaders, button text, pull quotes, navigation
Regular (400)	Body copy, captions, UI text, long-form paragraphs

Supporting Typeface: PT Serif

Used for elevated readability in long-form content, testimonials, mission statements, and formal print materials.

"ReDefiners changed how my child sees the world. Language learning opened doors we never imagined."
— Parent Testimonial

Typography Best Practices

- Maintain 1.5x line height for body text for scroll-friendly reading
- Never use more than two typefaces in a single composition
- For video, add subtle motion to headline text: a fade-in or slide-up
- Always use high-contrast text and background pairings

4 Logo System

Always pull logo files from the sources below instead of screenshotting an old email or reusing a compressed export. A blurry logo undercuts everything else in this guide.

External Partners & Media

Every logo file, in every format, lives in our public Brand Kit on Google Drive. Share this link with press, partners, and vendors who need our assets.

Open the Brand Kit

Staff & Marketing Team

Staff and the Marketing Team should pull assets straight from our Canva Team Account instead, since it stays current with our live templates.

Open Canva Brand Templates

Primary Official Logos

Use the Primary Official Logo everywhere you have room for it: headers, print materials, email, presentations, event signage, social posts. It should be what people see the vast majority of the time, because the full lockup, tagline included, is what actually builds recognition. Reach for a symbol only when the situation on the right calls for it.

ReDefiners

Official Logo — Navy

Use on white, cream, or light backgrounds

ReDefiners

Official Logo — White

Use on navy or dark backgrounds only

ReDefiners

Official Logo — Gold **LIMITED USE**

Reserve for premium or anniversary contexts only

Incorrect

White Logo on a Light Background

Not enough contrast to read. The White logo is for navy or dark backgrounds only.

Correct

Navy Logo on a Light Background

Full contrast, easy to read at any size.

Logo Symbols — Secondary Use Only

Reach for a symbol only when there's no room for the full logo: favicons, social profile photos, app icons, or a small watermark in a corner. At that size the tagline stops being legible anyway, so the symbol carries the mark on its own. Never swap a symbol in for the full logo just because it looks cleaner.

Symbol — Navy

Social avatars, favicons, small formats

Symbol — Gold **LIMITED**

Premium or anniversary contexts only

Symbol — Seafoam **LIMITED**

Light accent applications only

Favicon

Web browser tabs, app icons

10th Anniversary Logo (2016–2026)

ReDefiners · 10 Years

10th Anniversary Celebration Logo

Use for milestone campaigns and commemorative materials only. Retire after December 2026.

Legacy & Special Use: Warm Gold (#DBB64D) and Sky Blue (#7A9D96) are retired from the main palette. Reserve both for anniversary and legacy contexts only, the same treatment as the 10th Anniversary logo above, and never bring them into a current digital campaign.

Clear Space Rule: Visual Guide

Maintain empty space equal to the height of the capital "W" in "World Languages" around all sides of the logo. We call that height X for the rest of this section.

Step 1

Take the capital **W** from "World Languages" in the logo's tagline. Its cap height is your unit.

Step 2

Use that same **W** as the minimum gap on all four sides of the full logo lockup. The hatched zone stays empty: no text, no photo, no other logo.

Correct

The CTA button sits a full clear space away. The logo has room to breathe.

Incorrect

The CTA button crowds right up against the logo, well inside the clear space zone.

Pro tip: placing the logo over a photo or busy background? Drop a solid Navy or White rectangle behind it first, then apply the clear space rule to the rectangle's edges instead of the photo.

Logo Don'ts (FY26-27 Enforcement)

- No stretching, rotating, or recoloring outside the approved palette
- No drop shadows, gradients, outlines, or filters on the logo
- No placing over low-contrast imagery without a solid background box
- No adding text, icons, or slogans inside the clear space zone

5 Brand Voice & Messaging

We sound like people who actually believe language changes lives, not like a brochure. Warm, direct, and specific beats clever every time.

tone	what it sounds like	example
Inspiring	Hopetful, forward-looking	"Every word learned opens a new door."
Inclusive	Welcoming, barrier-free	"Classes for every age, background, and budget."
Empowering	Action-driven, confident	"You belong here. Start your journey today."
Community	Collaborative, story-driven	"Join families across Tampa learning together."

Language Principles

- Lead with benefits:** "Gain confidence," "Connect globally," "Stand out academically"
- Highlight accessibility:** "Free and low-cost options," "No prior experience needed"
- Showcase impact:** real student voices, short video testimonials, before-and-after stories
- Avoid jargon:** say "language classes," not "proficiency-based immersion programming"

FY26-27 Messaging Framework: AIDA+ Model

- Attention:** bold headline in Montserrat Black with a vibrant Amber accent
- Interest:** a quick benefit-driven subhead and a diverse student visual
- Desire:** a social proof, a testimonial, an enrollment stat, a partner logo
- Action:** a clear CTA button in Energetic Orange with Navy text: "Reserve Your Spot"
- + Follow-up:** "Share your journey #ReDefinersWL" for user-generated content

6 Digital-First Applications

Social Media Template Strategy

Social still gets the boldest treatment in our system, but the two accent colors don't share a job here. Amber carries broad, frequent brand presence as our light anchor — highlight blocks, stat call-outs, accent lines — but stays out of clickable elements; Orange still owns bold, full-bleed backgrounds and CTAs. Email and web stay calmer by comparison, using Orange only for buttons and small highlights.

platform	visual strategy	color priority
IG Reels / TikTok	Vertical video, quick cuts, student highlights	Orange background, Navy text and logo, Amber accent line
Instagram Feed	Carousel stories, before/after journeys	Orange background blocks, Navy text, Navy CTA button
Facebook	Community events, parent testimonials	Cream background, Navy text, Amber accent block behind headlines
LinkedIn	Impact stats, partner spotlights	Navy background, White text, Amber stat highlights
YouTube Shorts	15-second success clips, teacher intros	Orange background, Amber accent line transition

Email & Web UI Guidelines

- Primary buttons:** Orange fill with Navy text, 8px border-radius
- Secondary buttons:** Navy outline, white fill
- Hover states:** darken accent colors by 10%, never lighten
- Loading and transitions:** a subtle Amber pulse at 30% opacity

Video export settings: 1080×1920 (9:16) for vertical, 1920×1080 (16:9) for horizontal. Always burn in closed captions. Max file size: 500MB.

7 Brand Stewardship & Contact

Have a question about using the brand the right way? Reach out before you publish, not after.

Boilerplate for Press & Partners (FY26-27)

ReDefiners World Languages is a Hillsborough County non-profit pioneering accessible, joy-driven language education for PreK-5th grade learners and adults. Offering Arabic, Mandarin Chinese, Spanish, and English programs, we equip individuals with multilingual skills for academic success, career advantage, and global connection. Founded in 2016 by educator Chantelle Daniels, we believe language learning is a right, not a privilege. Learn more at redefinerswl.org · #ReDefinersWL

Social Handles (Consistent Across Platforms)

@redefinerswl — Instagram, Facebook, X/Twitter, TikTok

@redefinersworldlanguages — YouTube

/company/redefinerswl — LinkedIn

Final note: this guide balances what makes ReDefiners who we are with what actually gets used day to day. Lead with real student stories, use the bold colors on purpose, and design for accessibility every time.
